

Pet Waste ELIMINATOR

Commercial Pet Waste Disposal System
1-800-790-8896

Pet Waste Eliminator instructions:

E3 Kit includes:

- 1 Dispenser box (E1)
- 1 Sign (E802) or similar
- 1 10-gallon trash receptacle (E10)
- 1 8' sign post (E18)
- 80 pet waste bags (item E41)
- 250 trash receptacle liners (E42)
- 1 Mounting hardware kit for sign (E103)
- 3 Mounting hardware kits for box, trash receptacle, & lid (SSH104)
- 1 Trash receptacle lid (E11)

To install the Pet Waste Eliminator(PWE), we recommend these 8 easy steps:

1. Lay the sign post on the ground in the area in which the PWE system will be installed. The front of the post has two flat surfaces left and right with the channel recessed in the middle.
2. Position the bottom of the waste receptacle approximately 30" from the bottom of the post. Using one of the SSH104 kits, attach the receptacle to the post using two screws.
3. Next, position the lid on top of the waste receptacle. The lid is not fastened directly to the waste receptacle; the lid has a mounting hanger with a hinge. The hanger slides into the channel of the post and is fastened in place with two screws using one of the SSH104 kits.
4. The dispenser box (E1) is attached to the post above the waste receptacle. To position the box, open the trash receptacle lid and place the dispenser box so that the lid can be opened and closed while clearing the box. Attach the dispenser box to the post using the third SSH104 hardware kit.
5. Attach the sign at the top of the post. Position the sign so that the top hole of the sign is aligned with the top hole of the post. Sign is bolted into position using the E103 hardware kit.
6. Install the sign post approximately 18" into the ground. There should be about 12" from the bottom of the waste receptacle to the ground once the post is installed.
7. Open the dispenser box and insert up to 4 header cards of E41 pet waste bags on the prongs inside the dispenser box.
8. Insert one trash liner (item E42) into the trash receptacle.

Congratulations! Your property will now be cleaner and you will save hundreds of maintenance hours every year!
